

*Preferred by Patients, Trusted by Physicians*

## HOME CARE

Access to great care from  
the comfort of your own home

---

CONTINUITY OF CARE

---

IMPROVED PATIENT EXPERIENCE

---

COST SAVINGS

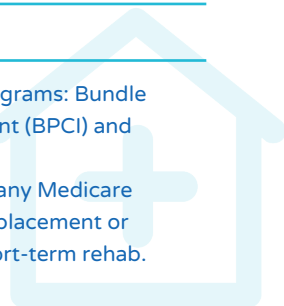

---

---

## WHO'S ELIGIBLE

---

Patients in either of these programs: Bundle Payment for Care Improvement (BPCI) and Comprehensive Care for Joint Replacement (CCJR) or any Medicare patient who has a total hip replacement or total knee replacement or short-term rehab.

---

## ACCESS AT HOME PRE-REHAB VISIT

---

Our prehab program is designed to maximize a patient's postoperative outcome and help to facilitate a faster recovery. We will come to the patient's home and perform an assessment on their layout, accessibility, and safety before they have their surgery. We will give them imperative suggestions on adaptive and assistive equipment, safety suggestions regarding their home layout, and what to expect after surgery. This program begins 1-2 weeks prior to a patient's scheduled surgery.

---

## ACCESS AT HOME POST-SURGICAL VISITS

---

After a patient's acute care stay or short-term rehab, we will go into their home to provide treatment while they are recovering from their surgery. We will contact the patient to set up the appointment schedule as soon as we receive the discharge date from the case manager.

During this time we will focus on function and safety as well as strengthening and conditioning appropriate to the diagnosis and the patient's surroundings.
